

Broadband UHF Mobile Antenna

380-470 or 450-520MHz

CD61 Series

The CD61 Series broadband antenna supports multiband radio technology, providing full interoperability among emergency services and commercial radios, regardless of UHF segment used. They provide outstanding coverage of UHF frequencies, in a ready-to-install, no tune design.

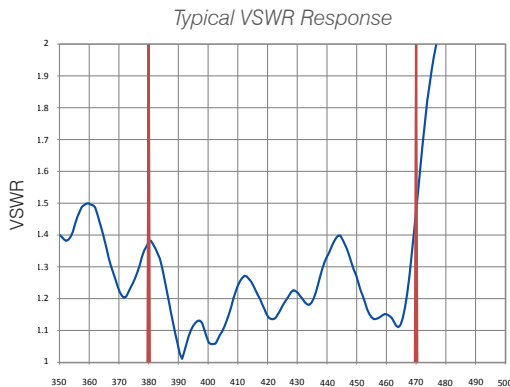

The integrated matching circuit is housed in a rugged, impact-resistant base for maximum durability with a fully moulded highly flexible whip. The CD61 is designed to interface with standard PL259 (MBC) mobile mounts, facilitates existing installation upgrades on public safety vehicles.

Features:

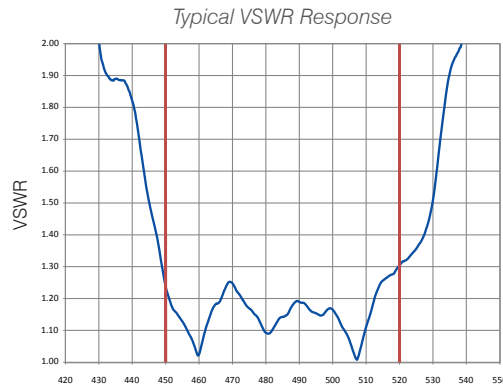

- Ground plane independent design allows alternative mounting locations
- Ultra broadband coverage mean no tuning in the field
- Highly flexible over-moulded whip
- Base is virtually indestructible

VSWR Plot (380-470MHz):

VSWR Plot (450-520MHz):

Electrical

Model Number	CD61-3847-XX	CD61-4552-XX
Frequencies MHz	380-470	450-520
Gain dBq	4.0	
Polarisation	Vertical	
VSWR	<1.5:1	
Impedance Ohms	50	
Power Handling W	25	
Tuned Bandwidth	Full	

Mechanical

Model Number	CD61-3847-50	CD61-3847-53	CD61-4552-50	CD61-4552-53
Whip Material	TPU Over-moulded whip			
Length mm	370		273	
Mounting	MBC base (included)			
Cable	Not supplied	5M RG58C/U	Not supplied	5M RG58C/U
Connector	Not included
